

Imagine not having to change a light bulb for the next 20 years!

Got your attention?

Mayer Lighting Showroom would like to introduce you to Cree Lighting's LED recessed light, winner of consecutive Lighting for Tomorrow awards in 2008 and 2009.

Let's get acquainted.....

**Cree's LED light uses 85% less energy than conventional incandescent lamps and less than half the energy of compact fluorescent lamps.**

**Each Cree LED is designed to last more than 50,000 hours.**

***Replacing standard recessed incandescent trims with Cree LED will save you more than \$300.00 per trim over the life of the LED.***

**Fifty plus times longer life than standard incandescent means fifty plus fewer chances to fall off a ladder and less time spent maintaining your home or business.**

**Cree LED lights contain no harmful mercury.**

**Cree LED lights can be used as new construction or they can be easily retrofitted with your existing recessed cans.**

Let us do the math. Contact Mayer Lighting Showroom for assistance with total savings and payback time for your specific job.

Call us at: Birmingham-(205) 583-3400, Pelham (205) 988-9234 or Dothan (334) 702-3212 or stop by either location for assistance.
